

BENEMÉRITA UNIVERSIDAD AUTÓNOMA DE PUEBLA

XX TALLER INTERNACIONAL NUEVAS TENDENCIAS EN LA ENSEÑANZA DE LA FÍSICA

Teaching physics out of school
Bayram Akarsu
(Erciyes University, Kayseri, Turkey)

Liquid crystals in education
Mojca Cepic
(University of Ljubljana, Slovenia)

Explorations in Physics:
Getting non-science students
involved in the process
of scientific inquiry
David P. Jackson
(Dickinson College, USA)

Teaching physics
with simple experiments
Gorazd Planinšic
(University of Ljubljana, Slovenia)

New Trends in Physics Teaching:
A personal retrospective
Dewey I. Dykstra
(Boise State University, USA)

Transitional to formal operational:
using authentic research
experiences in the conceptual
physics course to get students
to think more like scientists
J. Christopher Morre
(Coastal Carolina University, USA)

Using ISLE cycle help students
develop new ideas
and solve complex problems
Eugenia Etkina
(State University of New Jersey, USA)

Learning physics with technology
Oliver Zajkov
(University Cyril and Methodius, Macedonia)

DEL 24
AL 27 DE
MAYO
2012

Symbolic embodiment and
cognitive interactions in physics
learning situations
Hunter Close
(Texas State University, USA)

Using Activity Theory to
understand changes in physics
teaching practice:
Two case studies
Eleanor Close
(Texas State University, USA)

Puebla, México
Salón 105
BUAP
